7Fe/6 Word equations for burning fuels

Nan	ne	Class
	When a candle burns, a chemical reaction happens.	
	Fill in the boxes and the gaps in the sentences, using words from the list.	
	+ → +	(+
	reactants pr	coducts
	This type of reaction is called a r	eaction. It is
(cannot be reversed). The candle wax is the and oxygen comes from the		e wax is the
	air candle wax carbon dioxide combu fuel irreversible oxygen water	
	Now complete these word equations for the comb a wood + \longrightarrow + $(+)$	
	b natural gas (methane) + \rightarrow	+ (+)
	\mathbf{c} ethanol + + +	(+
